THE
CHARITY HOSPITAL
 OF LOUISIANA,
 WAS FOUNDED IN THE YEAR 1786

BY
DON ANDRES ALMONASTER Y ROXAS,

To whose generous endowment, the munificence of the

LEGISLATURE OF THIS STATE,

and the liberality of the State of Pennsylvania, the community is indebted
 for the means of erecting this edifice, built in the year

1832.

His Excellency A. B. Roman, being Governor and Ex-Officio President
 of the Institution.

*To record which and inscribe hereon the names and contributions of
 its distinguished benefactors,*

In Memoriam.

A. RINGGOLD BROUSSEAU.

Born in the Parish of Lafourche, January 8th, 1851.
Died March 25th, 1902.

To the Vice President and Board of Administrators:

Gentlemen—Your Memorial Committee respectfully report as follows:

The Board of Administrators of the Charity Hospital feel called upon to express publicly and officially their regrets at the death of their late colleague, A. RINGGOLD BROUSSEAU, who was identified with the management of this great charity for a period of twelve or more years. Thoroughly impressed with its work and purpose, and imbued with large ideas as to its usefulness and practical ministrations, he labored with an earnest zeal to develop it. In the time that embraced his honorary stewardship, the institution has much widened itself, and he fully shared in the creditable work that has placed it alongside of the most famous of its kind. Attentive and conscientious, he discharged his duties to the fullest, and merited the encomiums that we now bestow upon him. In view of his death, be it

Resolved, That we mourn it, and hereby record our regrets;

Resolved, That we fully recognize his gratuitous and unselfish work, in which he displayed marked ability and untiring energy;

Resolved, That we sincerely sympathize with his bereaved wife and family, to whom we tender our sincere condolence;

Resolved, That a copy of this preamble and these resolutions be transmitted them, under seal, duly attested, and that they be fully inscribed on the minutes of the Board.

Respectfully,

W. G. VINCENT,
HUNTER C. LEAKE,
G. S. BEL, M. D.

ATTEST:

EDWIN MARKS,
Secretary.

ANNUAL REPORT
OF THE
BOARD OF ADMINISTRATORS OF THE CHARITY HOSPITAL

For the Year Ending December 31st, 1902.

CHARITY HOSPITAL, }
STATE OF LOUISIANA, }
NEW ORLEANS, February 2, 1903. }

To His Excellency W. W. Heard, Governor of the State of Louisiana and Ex-officio President of the Charity Hospital Board of Administrators.

Your Excellency—The annual report of the Board of Administrators gives a summary of the work accomplished and of the expenses incurred during the past year. For more specific information and details you are respectfully referred to the reports of the officers and of the House and Finance Committees.

The disbursements for the year amounted to \$126,642.15 and the revenues to \$134,799.14, leaving a surplus in the general fund of \$8,756.99. This is due to the increase in the revenues from auctioneers' returns, slaughterhouse and gate fees, which exceeded those of the preceding year by \$3,062.86, and from the \$5,000.00 additional appropriated by the State for the extension of the Trained Nurse system. This, when complete and in operation, will largely increase the expenses and about absorb the surplus. The number of nurses now in training is sixty, and it is contemplated to increase the number to 120, to fully supply the various services.

There is also to the credit of the special fund \$34,795.21, composed of donations and legacies. It is with this fund that we have been enabled to construct the Miles' Surgical Amphitheatre, the Milliken Memorial Hospital for Children and the A.

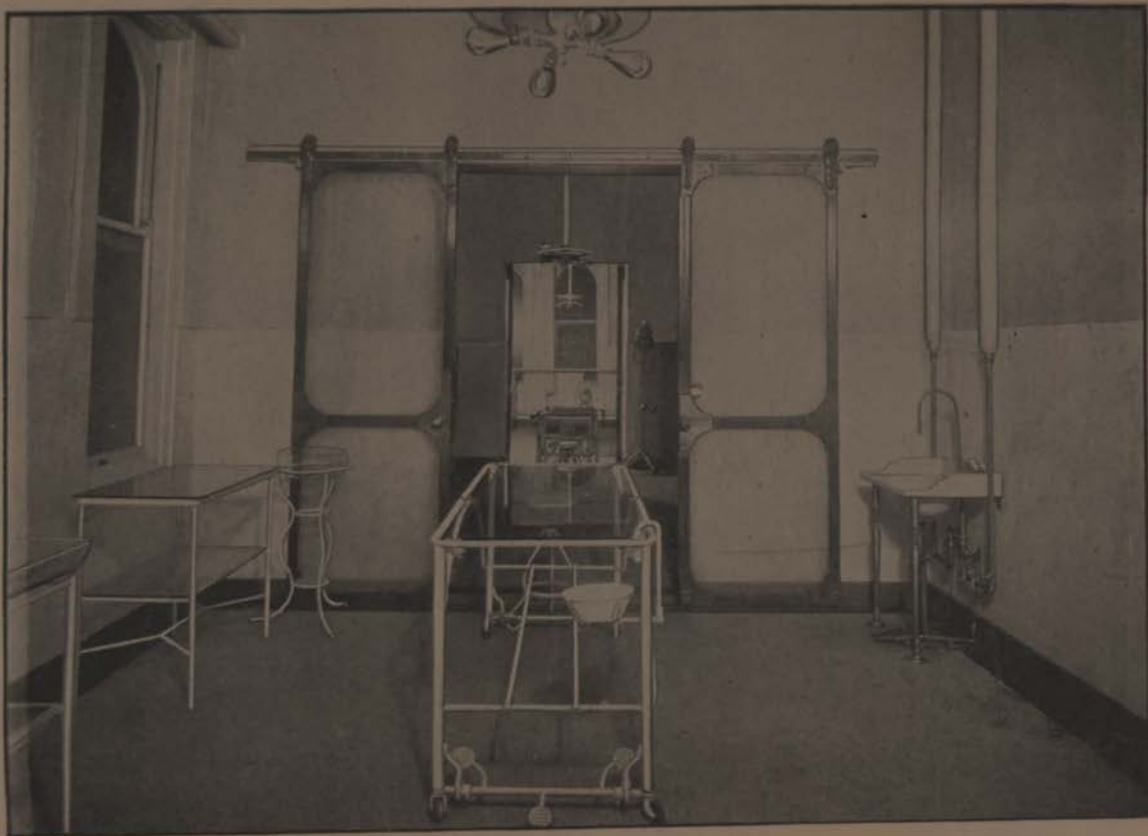

C. Hutchinson Memorial Home for Nurses. There are other improvements contemplated in the near future, whenever the means at our disposal will permit.

There were 8,176 admissions, with 617 remaining over, making a total of 8,793, which is 424 more treated than in the previous year. Of this number 7,062 were discharged and 1,116 died. This includes 358 persons who died within thirty-six hours of admission, and 148 who were subjects for coroners' inquests. There were 4,228 amphitheatre cases, 1,408 surgical operations and 252 births. In the Out Clinics 21,129 patients were treated and 79,263 consultations given. The number of ambulance calls numbered 1,687.

The A. C. Hutchinson Memorial Home for Nurses is now completed, partially furnished and occupied by the corps of nurses which is being rapidly increased in number. It is a massive structure, and was fully described in the ceremonies recently held. The grounds surrounding it have been improved with Schillinger walks and an iron fence and brick sidewalk constructed on Magnolia street, from Tulane avenue to Gravier street. A double frame house on Villere street, adjoining the ambulance house was also erected. The general repairs and renovation necessary to the Hospital buildings were very extensive.

In the Clerical, Pathological, Pharmaceutical and Engineering Departments the work done has been satisfactory, and the officers in charge, James R. Leake, Drs. O. L. Pothier and M. Couret, and W. T. Taylor and John Ponder, deserve our thanks, as also the efficient Secretary and Treasurer of the Board, Edwin Marks.

For the general supervision of the economy of this great institution and for the maintenance of discipline and a healthy moral tone among its varied inmates which the presence and example of good and pure women insures, our grateful thanks are tendered Sister Agnes and her co-helpers of the Sisterhood.

OPERATING ROOMS—A. B. MILES AMPHITHEATER.

The young ladies of the Training School, with Miss-Huyghe to supervise, have been earnest and faithful in their work. In their new quarters, which the generosity and philanthropy of Mr. Hutchinson provided, they will enjoy greater comforts and luxuries in their hours from duty, which will give increased zest and dignity to their work. In the enlargement of the corps their sphere of usefulness will be extended and their responsibilities increased. We tender them our sincere thanks.

As the executive officer of the Charity Hospital, Dr. J. D. Bloom, and his assistants, Dr. E. D. Fenner, lately resigned, Drs. J. M. Batchelor and J. A. Danna, have rendered efficient and praiseworthy service. We thank these gentlemen, as also the firm of Farrar, Jonas & Kruttschnitt, our attorneys, the Visiting Staff, the Resident Students, the Ambulance Corps and the employes of the Hospital in general.

We also avail ourselves of this opportunity to express our grateful thanks to the friends of this institution who have made donations. To our legislative bodies and to his Excellency Governor Heard, for the increase in the State appropriation, which will enable the Board to carry out its plans in extending the Trained Nurse system to every service in the Hospital to the great advantage of the sick.

In closing, I desire to express to my colleagues on the Board my appreciation of courtesies shown. We have worked in harmony and unity of purpose in the interest and for the advancement of this great institution. Let us continue our work in the same spirit and it will prove, as in the past, a work of pleasure and of love.

E. S. LEWIS, M. D.

Annual Report of the House Committee.

CHARITY HOSPITAL,
STATE OF LOUISIANA, }
NEW ORLEANS, February 2, 1903.

To the Vice President and Board of Administrators:

Gentlemen—Your House Committee respectfully report the following improvements made during the year 1902:

Improvements appertaining to the surroundings of the "A. C. Hutchinson Memorial Home for Nurses" consist of the following:

Iron fence on Magnolia street, extending from Tulane avenue to the Nurses' Home, Schillinger walks, new brick sidewalk on Magnolia street, from Tulane avenue to Gravier street. These necessary additions are first-class in every respect.

Double frame house on Villere street, near Tulane avenue.

It was found necessary to demolish the old double cottage on Villere street on account of natural decay; they had been rented to the ambulance drivers for many years past. There has been erected in their stead a comfortable well finished two-story double house to be used for the same purpose. The cost of construction was paid out of the Special Fund.

AMBULANCE SERVICE.

This service has been well maintained for the past year, and the property, horses, ambulances, etc., are in good condition.

The contract supplies for meat, bread, milk and ice have been delivered properly.

General repairs for the year to the Hospital buildings, such as repainting, calcimining, etc., have been quite expensive, but were of prime necessity.

The thanks of the Charity Hospital are due to Dr. V. Ranna, Veterinary Surgeon, for his valuable and gratuitous services in caring for its stock during many years past, and for his generous promise to continue them in the future.

Your Committee are, as usual, indebted to our able Chief Engineer, John Ponder, for his great services in his department.

Respectfully submitted,

JOHN T. GIBBONS,

WM. G. VINCENT,

LOUIS ED. VALLOFT,

House Committee.

Annual Report of the Finance Committee.

CHARITY HOSPITAL,
STATE OF LOUISIANA, }
NEW ORLEANS, February 2, 1903. }

To the President and Board of Administrators:

Gentlemen—The statement furnished by Treasurer Edwin Marks, accompanying this, shows in detail the receipts and disbursements in the General Fund for the year just closed. The figures presented in the statement have been found correct by the special committee charged with the examination of the books and are so certified to by them.

The expenses for the year have been slightly in increase of the same time last year, while the receipts for the General Fund, from all sources, have been increased as shown in the statement; and we have at the end of the year a surplus in the General Fund of \$8,756.99. This arises mainly from the fact that the "A. C. Hutchinson Memorial Home for Trained Nurses" has not been put in full operation, we having been delayed because of the incomplete state of the building. We have at this time some fifty-two nurses in employment. We expect this number to be increased to the extent of probably 120; so that, when the Home is fully occupied, this surplus will be available.

It is gratifying to your committee to note that there has been an increase in the revenues of the Hospital from the following sources:

	1891.	1892.	Increase.
Auctioneers' returns.....	\$8,131 90	\$9,922 72	\$1,790 82
Slaughterhouse fees.....	6,964 94	7,693 83	728 89
Gate fees.....	2,850 60	3,393 75	543 15
	\$17,947 44	\$21,010 30	\$3,062 86

There is to the credit of the "Special Fund," \$34,795.21 (December 31st, 1902). This fund is created by donations and legacies, and is used for the purpose of erecting buildings and making permanent improvements, and is added to from time to time by benevolent friends of the institution. A list of contributors to this fund is submitted by the Secretary and Treasurer.

Respectfully submitted,

R. E. CRAIG,
HUNTER C. LEAKE,
G. A. WIEGAND,

Finance Committee.

Mr. C. G. Louderbough, Empire, \$5.00.

Annual Report of the House Surgeon.

CHARITY HOSPITAL,
STATE OF LOUISIANA, }
NEW ORLEANS, February 2, 1903.

To the Vice President and Board of Administrators:

Gentlemen—Measurable with the resources of administration, needfully economic, the accord of progress that has marked the onward course of this institution with scientific advancement has been ample and phenomenal in result. In the aggregate of structural improvements, broadened sphere of usefulness and in the general service of institutional showing it is now privileged to the equal of any like public free medical charity within the limits of this continent.

Of the many additions that have contributed to the material detail of service the full accommodation for a trained corps of female nurses, secured through the philanthropy of the late A. C. Hutchinson, rounds the comfort to the sick that in assiduous effort and hope we have long striven towards.

A summary of the service for the year that has closed, in which the benefits that are now being inaugurated have been adequately anticipated, shows the admission into the Hospital of 8,176 patients, of which, 4,890 were white and 3,286 colored. Adding to this number the patients remaining on January 1st, 1902, the total number of indoor patients cared for during the year was 8,793. Of this number, 7,062 were discharged from the institution, cured, improved or stationary; 1,116 died and 615 were remaining in the institution at the close of the year. Of the deaths that occurred, 575 were white and 541 colored, and of this number 358 were admitted moribund, dying within a short while of admission; 148 were viewed by the coroner. The per-

centage of deaths that occurred gives importance to the permanency of the decline in the true death rate observed during the past seven years, from 11 to 9 per cent., the gross death rate for the year showing a further decrease of 12 per cent.

In the clinics for the out-door poor, 21,129 new patients sought assistance and to whom 79,263 consultations were additionally given to further aid in relief. The Out-door Work, so efficient in the merit of service rendered by our Ambulance Corps of Resident Students, exceeds all previous records in answering 1,687 calls as tabulated in the subjoined report, which shows the value of this branch of medical work to the public at large. The equipment of this service is being replenished with such improvements as the varying character of work has shown necessary. The call-time average for the year was 32.4 minutes.

The Lying-in Department of the institution records the birth of 252 babes, of which there were four births of twins and one of triplets. Of the 246 mothers, seven died, they having been admitted into the institution in a precarious condition. The mortality was but 2.8 per cent.

With every modern facility to the design of a perfect surgical detail has the A. B. Miles' Amphitheatre been conducted, and in the year's work, which represents 1,408 major surgical operations and 4,228 accident cases, exceeding every previous year, the results have been attended with a lowered mortality and pleasing effect.

In the Department of Pathology and Bacteriology the addition of work registers the increasing activity of our several Hospital departments and the valuable assistance this department renders. The animal pens instituted during the year have greatly added to the readiness of the service and its economy of management.

The investigation carried on as to the method of propagation of Typhoid Fever is still unfinished. The merit of work and

industry of Dr. O. L. Pothier, Pathologist, and his assistant, Dr. M. Couret, deserves praiseworthy mention.

The importance of Chemistry and Pharmacy in its departmental force and influence grows with each succeeding year. The attentive and conscientious effort of our Chemist, Mr. W. T. Taylor, has contributed to this advance. The department is being economically managed, and in addition to the daily analysis of milk supplied, a full guidance in all matters, therapeutical and chemical, is given by the department.

The medical archives in the space arranged in the Male Clinic Building carries with its aid in reference a stimulus to medical research. The Registrar reports having filed 1,310 case histories, including 334 surgical, 867 medical and 108 gynecological.

Our Nursing School, upon which has been addressed to your Medical Committee the reports for the year, recording its progress, the increasing number of pupils and the completion of their new Home, is most promising in outlook. The installation of the A. C. Hutchinson Memorial on December 10th, inaugurated an era as gracious and wholesome in human benefits as was his generously displayed philanthropy. The classes of the school are being rapidly enlarged and now number sixty pupils.

The Richard Milliken Memorial for Children continues as a Hospital pride for modern appointment and detail, enlisting favor and friends for its exemplary care of the sick children of the poor. The constant supervision of the several departments associates a guidance for the needs and character of improvements to meet the demand and facility of service. In this, a yearly review is pertinent and a pleasure to report:

The re-arrangement of ward duties and accessories to a service that a methodically schooled assistance of pupil nurses will afford has been secured; special dressing room space adjoining lavatories in Amphitheatre for the exclusive use of the Surgical Staff; improved electric illuminating paraphernalia and bandage

rolling apparatus; enlarging the X-Ray dark room with the installation of 16-inch spark X-Ray coil and Finsen's Ultra-Violet Ray apparatus; improvements in ambulance equipment; the removal of pupil nurses to the A. C. Hutchinson Memorial and active renovation, still in progress, preparatory to the use of the space occupied by them to give a greater ward facility for gynecological and surgical patients, is the summing up of the gross measures instituted toward improvement, without particularizing the many minor ones.

With the several innovations of service, certain essentials to an evenness of office, deserves a mention and your consideration.

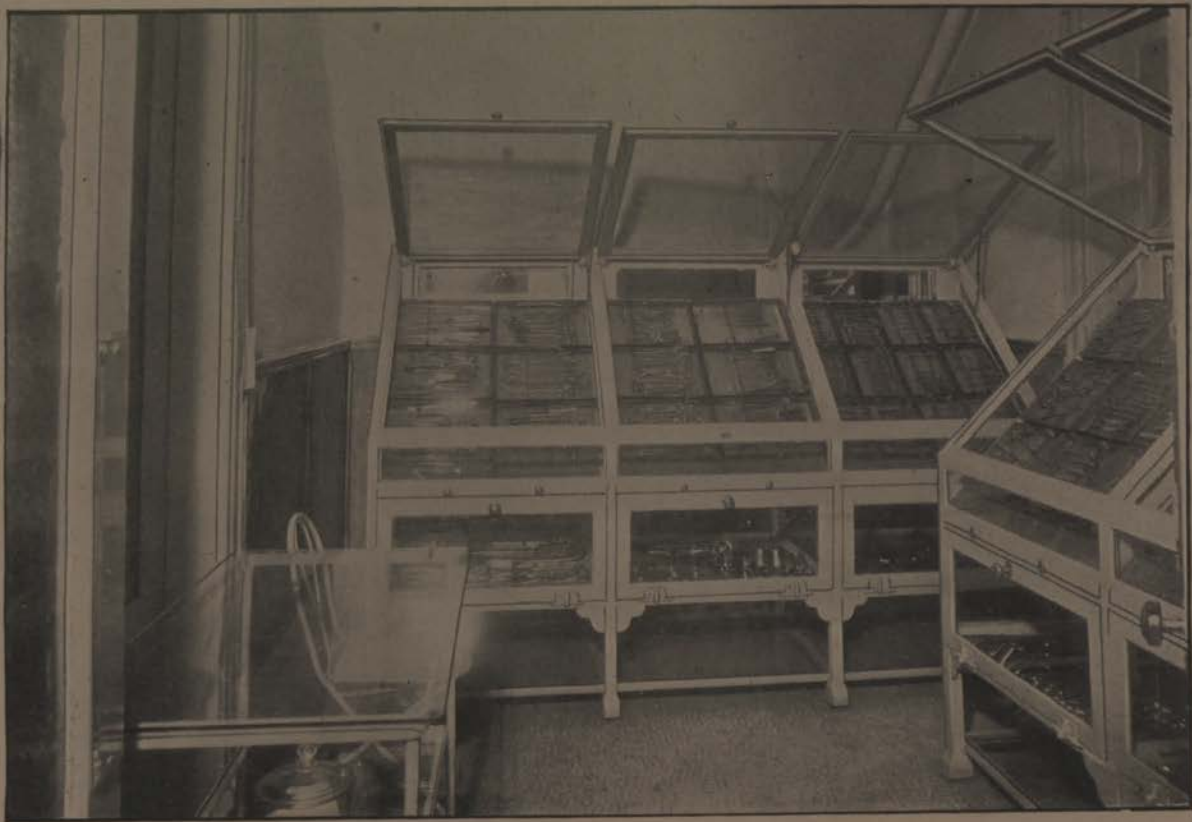

The Medical Department of Tulane University has recently inaugurated a four-year course of study, which cannot but enhance advantages for efficient clinical study.

Fittingly, I beg to suggest that the eligibility for admission by examination to the position of Resident Student be raised, in course of study, to permit of a selection for our Staff of Externe Students, from second or third coursemen, and in which, I believe, the Faculty will aid by encouragement. This will secure an earnest and intelligent aid in our large clinical service as well as a class of Internes unincumbered by active college duties.

The crowded condition of our colored surgical wards continues, and is again called to your attention in the hope of securing, through a philanthropic source, a consummation of the plans mapped out for isolation of the races in separate buildings, and which will be permitted by the erection of the administration, Kitchen and Power Buildings, as has been previously laid before you. The cost of construction, by estimate, weighs insignificantly with the multiple benefits to accrue.

The year's duties in the several departments have been in harmonious accord, vying in effort to a betterment of service to the charity purports of this institution's life and vigor.

With an aim to the fulfillment of charity blessings unfaltering, in this self-imposed duty, has been the labor of our helpful

INSTRUMENT ROOM—A. B. MILES AMPHITHEATER.

band of Sisters of Charity, contributing in work, sacrifice and intelligent aid to the support of every measure to this end. Every department feels this influence that is happy in effect and justly deserving of praise and thanks. Of their number, Sister Erasma died on July 17 of the year. She served this institution for fifty-one years in kindness and humanity.

In the personnel of our Staff, the resignation of Dr. E. D. Fenner is recorded with regret. His valuable and conscientious service endeared him to this institution.

In the work of the year I have been further helpfully assisted by my assistants, Dr. J. M. Batchelor, and during the short term of office by Dr. J. A. Danna, who has rendered a satisfactory aid.

The support and assistance rendered by those associated in this work is of pleasure to mention.

The interest and attentiveness of the Visiting Staff have added much to the year's successful results.

Our excellent Engineer, Mr. J. Ponder, whose competency and readiness are so satisfactory, is in full merit of thanks.

The Hospital records have been complied with care by our Clerk, Mr. J. R. Leake.

The year has lent an emphasis to the confidence in which the institution is held. Its organization, standards and duties have been shaped to public service in faithful effort—charity and humanity.

Respectfully submitted,

J. D. BLOOM,

HOUSE SURGEON.

Pathological Department.

CHARITY HOSPITAL,
STATE OF LOUISIANA, }
NEW ORLEANS, February 2, 1903.

To the Board of Administrators of the Charity Hospital:

Gentlemen—I beg to submit the following annual report of Pathological Department for the year 1902 :

Specimens of urine examined	7,071
Specimens of blood examined.....	2,799
Specimens of sputa examined.....	747
Specimens of cultures examined.....	203
Specimens of tissues examined.....	138
Specimens of pus examined.....	46
Specimens of stomach contents examined.....	13
Specimens of fluids examined.....	22
Specimens of feces examined.....	4
Specimens of secretions examined.....	4
Specimens of cyst examined.....	1
Specimens of tape worm examined.....	1
Autopsies held	183
Photographs taken, including Radiographs.....	141
	11,373

Appended to this report will be found a tabulated form giving the number of specimens examined each month, with the monthly and annual totals in the last right hand column.

The increase of work in the Department for the past year seems to have been general; I would specify, however, the decided increase of cultures made and examined, which is far above that of year past.

During the past year investigations as to the propagation of

typhoid fever were begun, and are still being conducted. This experimental work has been greatly facilitated by our new animal pens, which were established this year. In them we have raised the necessary laboratory animals, such as rabbits, guinea pigs and white rats. This will reduce the cost of experimental and research work and facilitate such work in the Department.

I wish, in concluding, to commend the valuable assistance given by Dr. M. Couret, the Assistant Pathologist, also that of the students detailed to the Department during the past year. I wish, also, to thank Dr. J. D. Bloom, our House Surgeon, for the means by which he facilitated the work of the Department.

Respectfully,

O. L. POTHIER, M. D.,

PATHOLOGIST.

Following is the routine work done in the department during the year:

HOSPITAL KITCHEN.

Report of Directress.

CHARITY HOSPITAL,
STATE OF LOUISIANA, }
NEW ORLEANS, December 10, 1902.

To the Members of Medical Committee, Charity Hospital Board of Administrators:

Gentlemen—The recurring pleasure of duty in detailing the service in which I have the honor to serve bears significantly upon this occasion.

Philanthropy has given endowment to our institution in the substantial expression of an implied interest and benevolence on the part of our good citizens.

In the measure of benefits to be derived by gifts adequate to the needs of so great a charity multiple blessings are secured, perfecting its offering for humanity to an All-Wise Providence.

The installation of the new Home provided for the young ladies who are intrusted to our care, for instruction and guidance in ministration to the sick and the dissemination of sanitary and dietary laws, gives an inexpressible pleasure in the wide influence to which our field of usefulness is privileged.

A conception of work that involves a character study in stability and force, special adaptability and endowment with the duty of discipline and the needs of progress, can arouse no other than conscientious effort.

A judgment by standard is essential in the duty to public good and institutional pride, toward which is shown in the year's statistics a release of fourteen out of the number, thirty-four, accepted during the session that has just closed. Of the number of applications received during the year, 390, many have been

appointed to come after January 1st, in anticipation of our improved facility and accommodation.

At the present time, forty-eight pupils make up the classes of the School, thirteen of whom have been submitted, with three Sisters, for a report upon their eligibility for graduation to the Faculty of Lecturers; twenty-two advanced to the Senior Class and thirteen in the Junior Class of the session to succeed. Of the many advantages that will follow the opening of the Home, a better systematized practical instruction is to be secured in the diet kitchen and sick room in preparation and precision, together with a healthful tone to the home-life diversions and recreations.

The gain in the confidence that has been exhibited to our graduates is healthful in tenor and pleasure-giving in their representation of our endeavor towards education and non-sectarian purpose.

The graduates to be presented to you to-day have to their credit an excellent School record, and by their display of intelligent interest and gentle, humane kindness have won our admiration and affection.

The corps of teachers associated in this work continue to exhibit a kindly interest, and their valuable services cannot be mentioned in other than praise.

Miss A. Huyghe, in the position of Superintendent, has given her best effort in contributing to the success of the session work.

The earnest and helpful aid received from the Faculty of Lecturers, marking the guide-post of the School's progress, merits your favor and special thanks.

With the adjunctive instruction in massage, efficiently given by Miss L. Woodin, the round of work, in conclusion, makes pleasing my report upon the satisfactory course of service of the School.

In the countenance of your excellent Board and its implied

confidence, I feel an additional prompting towards a greater effort in advancing the outline of management, and in a respectful compliance with your judgment and assistance give expression to my appreciation and thanks.

A poignant feeling of sorrow clouds the outburst of sentiment that weightily bears with to-day. In this, the dedication of the Nurses' Home, so modestly contributed by the late Mr. A. C. Hutchinson, and in the estimate of its benefits and the value of the gift to the people of our State, no more assuring demonstration could be had. In his recent demise the occasion is deprived of its crowning glory.

The signally bright outlook for a modern equipment in a full corps of the nurses' service, with its attending educational advantages, inspires the expression of my appreciation of the assistance and support of our estimable House Surgeon, Dr. J. D. Bloom, and his assistants during the year, Drs. E. D. Fenner and J. M. Batchelor, for whom my thanks are full and generous.

Institutional work of the God-inspired motive that contributes to lighten the burden of pain and suffering, and tends to the example of moral strength, is, happily, a duty of pleasure under the auspices of a conscientious Governor, and Administrative Board—a pleased public.

Respectfully submitted,

SISTER AGNES,

DIRECTRESS.

Report of the Chairman of the Faculty.

CHARITY HOSPITAL,
STATE OF LOUISIANA, }
NEW ORLEANS, December 10, 1902.

To the Members of Medical Committee, Charity Hospital Board of Administrators:

Gentlemen—With its enlarged scope, better facility and the actively well directed effort of the School's Directress toward awakening the resources of the School—essential benefits are to be secured that are gratifying and encouraging to the task imposed upon the School's teaching corps.

Accessions to the ranks of the professional nurse can be made to better understand the task and obligation, and it will contribute in number to applicants of mature judgment, intelligence and character.

These necessary factors towards progression will redound to a higher order of general medical knowledge in the people among whom the graduates go, in dispelling superstition and as missionaries of practical medical and sanitary truths.

The Hospital's influence to this end, within its local limitation, has been noticeable.

The gift that has enabled the realization of such prospect for good is modest in comparison with its yield of blessing, not alone to our city and State, but to the entire Southland.

The School's course of didactic and clinical study has continued along the outline originally adopted. The opportunities to be now enjoyed will permit of better schedules and regularity and a special course of review for our graduates, who are to be kept in touch with the School's progress and the advances in their professional work.

With a conclusion of the session of 1902, and in approval of the satisfactory examination and requirements of the applicants for graduation, I have the honor to submit, upon the part of the Faculty of Lecturers, the following named pupils as deserving the diploma and medal of the Charity Hospital Training School:

MISS MAY CAMPBELL	Georgia.
MISS NELLIE K. CHAMBERS	Texas.
MISS ELLA M. CROWELL	Alabama.
MISS CATHERINE M. DAYTON	Texas.
MISS ALINE E. D'HERETE	Louisiana.
MISS IRENE FERREL	Louisiana.
MISS EVA M. HARRIS	Georgia.
MISS LILLIAN M. HEWETT	Canada.
MISS ERMA KELLETT	Texas.
MISS AMELIA SIMMS	Louisiana.
MISS PENELOPE WADE	Mississippi.
MISS MAY E. WATERS	Louisiana.
MISS LOUISE B. WOLSCH	Louisiana.
SISTER ADEL	Charity Hospital.
SISTER AGATHA	Charity Hospital.
SISTER DOMINICA	Charity Hospital.

In appreciation of the confidence reposed, the Faculty desires to congratulate the Board and the institution upon the conditions that are to follow, towards which, in modest effort, it has endeavored to contribute.

Respectfully submitted,

J. D. BLOOM, M. D.,

CHAIRMAN OF FACULTY.

REPORT OF OUTDOOR DEPARTMENT, 1902.
